Introduction to Steps

Steps is the national charity working for all those affected by childhood lower limb conditions. By providing a sympathetic ear, clear information and helpful advice – with the reassurance of years of experience – we help families to find the best way forward. Our BMA Patient Information Award 'Highly Commended' publications cover conditions affecting the lower limbs, from treatment to practical advice. Our dedicated helpline offers emotional support and a network of family contacts to discuss shared experience. Our equipment fund helps make vital items affordable. We achieve this from public donations; we are not Government funded and all our publications are free. For more information on Steps please email info@steps-charity.org.uk
